

# Maple, Silver

*Acer saccharinum*

- **Large tree to around 70', but can reach well beyond 100'**
- **Upright spreading branches form an oval or rounded crown that seems to have sprays of foliage**
- **Tolerant of a wide range of soils (not high pH), drought and seasonal flooding**
- **Tolerant of urban conditions**
- 
- **Leaves bright green color above, silvery below**
- **3" to 5" long leaves,**
- **Typically leaves drop when greenish yellow or green**
- **Dull reddish orange in early spring**
- 
- **Paired seeds with horizontally spreading wings, 1.3" to 2.3" long, maturing in June**
- **Trunk and branches are silvery-gray**
