

Trees of the Village of Victor - ROOTS of THIS BOOK

This book has been compiled for your pleasure and information.

In alphabetical order, the trees listed are those which you find in the Village of Victor, along the streets and in the Municipal and Harlan Fisher Parks.

Descriptions are brief and written for ease of reading. Photos show mature formation, leaves in several seasons, any nuts or berries, and trunk bark.

If you would like a copy of any page, take the book to the library desk where a copy can be made of that tree for a nominal fee.

Please be sure to return the original to the notebook.

Why are trees so important? Trees are vital.

- **As the biggest plants on the planet, they take in carbon dioxide then give us oxygen, stabilize the soil and give life and shelter to the world's wildlife.**
- **They also provide us with the materials for tools and shelter.**
- **Shade – on a hot summer's day, there is nothing like this. The temperature in the shade is often 10 degrees less than out in the sun.**
- **And, they give us beauty in many colors, shapes and sizes.**

So, as you walk along the streets of the Village of Victor and relax in its parks, appreciate all that these gentle, giant plants are giving you.
