

Maple, Norway

Acer platanoides

- **Medium to large deciduous shade tree**
- **Rounded crown, densely branched**
- **Typically, 40' to 60' tall, but can reach 90'**
- **Often wider than tall when open-grown**
- **Adaptable to many soils, pollution**
- **Needs adequate space to develop**

- **Uniform dark green leaf color in summer**
- **Tan colored leaves late (end of October), can be a good, uniform yellow**

- **Blooms in April, numerous small, yellow-green flowers**
- **Paired seeds with horizontally spreading wings ("helicopters"), 1.5" to 2" long, turn green to tan**

- **Bark greyish-black, shallow ridges and furrows**

- **This tree is on the NYS list of invasive species.**
