

# London Planetree

*Platanus x acerifolia*

- Deciduous tree
- Heights to 70 or 80' tall
- Spread matches the height
- Shape is rounded
- Branching is upright and spreading
- Best in deep, moist, fertile soil, but very adaptable
- 
- Leaf color is medium to dark green
- Autumn leaves are yellow-brown
- 
- Unique seeds are 1" in diameter. Fruit is commonly known as "buttonballs"
- Bark exfoliates in plates, revealing creamy yellow inner bark
- 
- Uses: lawn tree
- Street tree when large spaces are available
- Good for difficult growing sites
- Good urban tree
